Contents

List of Scilab Solutions 3

1 Study and generate different Line Codes - 1 (Unipolar and Polar RZ and NRZ) 4

2 Study and generate different Line Codes - 2(Bipolar, Manchestre and Quaternary) 10

3 Study Carrier Modulation Techniques using BASK, BPSK and BFSK 17

4 Study and generate OQPSK waveforms 23

5 Study and generate NON OQPSK waveforms 27

6 Study and generate 8-QAM waveforms 30

7 Study and generate MSK waveforms (PSK Approach) 33

8 Study and generate MSK waveforms (FSK Approach) 36

9 To calculate all Codewords, error detection and correction capability of given LBC 40

10 To encode Cyclic code and calculate Syndrome for the given generator polynomial 45

11 To encode and decode Hamming code 51

List of Experiments

Solution 1.1	Study and generate different Line Codes 1 Unipolar NRZ	4
Solution 1.2	Study and generate different Line Codes 1 Polar NRZ	5
Solution 1.3	Study and generate different Line Codes 1 Unipolar RZ	7
Solution 1.4	Study and generate different Line Codes 1 Polar RZ	8
Solution 2.1	Study and generate different Line Codes 2 Bipolar NRZ	10
Solution 2.2	Study and generate different Line Codes 2 Bipolar RZ	12
Solution 2.3	Study and generate different Line Codes 2 Manchestre	13
Solution 2.4	Study and generate different Line Codes 2 Quaternary	15
Solution 3.1	Study Carrier Modulation Techniques using BASK	17
Solution 3.2	Study Carrier Modulation Techniques using BFSK	18
Solution 3.3	Study Carrier Modulation Techniques using BPSK	20
Solution 4.1	Study and generate offset QPSK waveforms	23
Solution 5.1	Study and generate Non offset QPSK waveforms	27
Solution 6.1	Study and generate 8QAM waveforms	30
Solution 7.1	Study and generate MSK waveforms with PSK Approach	33
Solution 8.1	Study and generate MSK waveforms with FSK Approach	36
Solution 9.1	Linear Block Codes	40
Solution 10.1	Cyclic Codes	45
Solution 11.1	Hamming Codes	51

Experiment: 1

Study and generate different Line Codes - 1 (Unipolar and Polar RZ and NRZ)

Scilab code Solution 1.1 Study and generate different Line Codes 1 Unipolar NRZ

```
1 //Note: Details of scilab software version and OS
    version used:
2 //Tested on OS: Windows 7 SP1, 64 bit and Windows XP
    SP3, 32 bit
3 //Scilab version: 5.4.1 (Tested on both 32 bit and
    64 bit versions)
4 //Program Title: Study and generate different Line
    Codes - 1(Unipolar NRZ)
