List of Scilab Solutions	4
1 Waveform generation for continuous signals	6
2 Waveform generation for Discrete signals	10
3 Basic Operations on DT signals	14
4 ADDITION AND MULTIPLICATION ON DT SIGNALS	18
5 EVEN and ODD SIGNALS	22
6 Linear and Non-linear Signals	25
7 Energy and Power Signal	29
8 Time Variance and Time Invariance	31
9 DISCRETE CONVOLUTION	34
10 Z- TRANSFORMS AND INVERSE Z - TRANSFORM	37
11 Fourier Transform	39
12 Fourier Series	43
13 Causal and Non-Causal	46
14 Sampling Theorem	48

15 Sampling rate Conversion

51

List of Experiments

Solution 1.01	PROGRAM TO GENERATE COMMON CONTINUOUS TIME SIGNALS	6
Solution 2.02	PROGRAM TO GENERATE COMMON DISCRETE TIME SIGNALS	10
Solution 3.03	TO PERFORM BASIC OPERATIONS ON DT SIGNALS	14
Solution 4.04	To perform addition and subtraction of the following two DT signals	18
Solution 5.05	EVEN and ODD SIGNALS	22
Solution 6.06	To find wheather the system is linear or non linear for the given signal	25
Solution 7.7	To find the energy and power of a signal	29
Solution 8.08	To find wheather the signal is time variant or time invariant for the signal	31
Solution 9.09	To perform discrete convolution for two given sequences	34
Solution 10.10	To find Z Transform and inverse Z Transform for the given sequence	37
Solution 11.11	Fourier Transform	39
Solution 12.12	Write a program to find the fourier series coefficients of a signal	43
Solution 13.13	To find whether the system is causal or non causal	46
Solution 14.14	To find the sampling theoram	48
Solution 15.15	Sampling Rate Conversion	51
