Book Description

Title: Mechanics Of Fluid

Author: B. S. Massey And A. J. Ward-Smith

Publisher: Taylor & Francis Group

Edition: 8

Year: 2006

ISBN: 9780415362061

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
1 Fundamental Concepts	5
2 Fluid Statics	8
3 The Principles Governing Fluids in Motion	14
4 The Momentum Equation	19
5 Physical Similarity and Dimensional Analysis	22
6 Laminar Flow Between Solid Boundaries	24
7 Flow and Losses in Pipes and Fittings	30
8 Boundary Layers Wakes and Other Shear Layers	35
9 The Flow of an Inviscid Fluid	40
10 Flow with a Free Surface	45
11 Compressible Flow of Gases	51
12 Unsteady Flow	59
