codes written in it can be downloaded from the "Textbook Companion Project"
section at the website <http://scilab.in>

Book Description

Book Description

Title: Basic Electrical Engineering

Title: Basic Electrical Engineering

Author: A. Mittle and V. N. Mittle

Author: A. Mittle and V. N. Mittle

Publisher: Tata McGraw Hill

Publisher: Tata McGraw Hill

Edition: 2

Edition: 2

Year: 2005

Year: 2005

ISBN: 9780070593572

ISBN: 9780070593572

Scilab numbering policy used in this document and the relation to the above book.

Scilab numbering policy used in this document and the relation to the above book.Example (Solved example) Example (Solved example) Equation (Particular equation of the above book) Equation (Particular equation of the above book) Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

EXA Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	7
List of Scilab Codes	8
1 DC Circuits	10
2 DC Circuits	11
3 Electrostatics	20
4 Electromagnetism	24
5 Magnetic Circuit	27
6 Electromagnetic Induction	39
7 Fundamentals of Alternating Current	50
8 AC Series Circuit	66
9 AC Parallel Circuit	78
10 Three Phase Systems	95
11 Measuring Instruments	105

13 Temperature Rise and Ventilation in Electrical Machines	109
14 Single Phase Transformers	111
15 Three Phase Transformers	125
16 Electromechanical Energy Conversion	128
17 Fundamentals of DC Machines	130
18 DC Generators	138
19 DC Motors	148
20 Testing of DC Machine	158
21 Three Phase Alternators	165
22 Synchronous Motors	174
23 Three Phase Induction Motor	183
24 Single Phase Induction Motor	202

List of Scilab Codes

Exa 1.1	Example on Ohms Law	10
Exa 1.1	Example on Ohms Law	11
Exa 1.2	Example on Ohms Law	11
Exa 1.3	Example on Ohms Law	12
Exa 1.4	Example on Kirchhoffs Law	12
Exa 1.5	Example on Kirchhoffs Law	13
Exa 1.6	Example on Kirchhoffs Law	13
Exa 1.7	Example on Kirchhoffs Law	14
Exa 1.8	Example on Superposition Theorem	14
Exa 1.9	Example on Superposition Theorem	15
Exa 1.10	Example on Thevenin Theorem	15
Exa 1.11	Example on Norton Theorem	16
Exa 1.12	Example on Nodal Analysis	16
Exa 1.13	Example on Maximum Power Transfer Theo- rem	17
Exa 1.14	Example on Delta to Star and Star to Delta Transformation	17
Exa 1.16	Example on Delta to Star and Star to Delta Transformation	18
Exa 2.1	Example on Coulombs Law	20
Exa 2.2	Example on Electric Intensity	20
Exa 2.3	Example on Electric Potential	21
Exa 2.4	Example on charging and discharging of ca- pacitor	22
Exa 2.5	Example on charging and discharging of ca- pacitor	22
Exa 2.6	Example on charging and discharging of ca- pacitor	23

Exa 3.2	Example on Field Strength and Flux Density	24
Exa 3.3	Example on Field Strength and Flux Density	24
Exa 3.4	Example of Force on on Current Carrying Con- ductor	25
Exa 3.5	Example of Force on on Current Carrying Con- ductor	25
Exa 4.1	Example on Series Magnetic Circuit	27
Exa 4.2	Example on Series Magnetic Circuit	28
Exa 4.3	Example on Series Magnetic Circuit	28
Exa 4.4	Example on Series Magnetic Circuit	29
Exa 4.5	Example on Series Magnetic Circuit	30
Exa 4.6	Example on Series Magnetic Circuit	31
Exa 4.7	Example on Series Magnetic Circuit	31
Exa 4.8	Example on Series Magnetic Circuit	32
Exa 4.9	Example on Series Magnetic Circuit	33
Exa 4.10	Example on Series Magnetic Circuit	34
Exa 4.11	Example on Series Magnetic Circuit	35
Exa 4.12	Example on Series Parallel Magnetic Circuit	36
Exa 4.13	Example on Series Parallel Magnetic Circuit	37
Exa 5.1	Example on Induced EMF	39
Exa 5.2	Example on Induced EMF	39
Exa 5.3	Example on Induced EMF	40
Exa 5.4	Example on Induced EMF	40
Exa 5.5	Example on Induced EMF	41
Exa 5.6	Example on Induced EMF	42
Exa 5.7	Example on Induced EMF	42
Exa 5.8	Example on Induced EMF	43
Exa 5.9	Example on Induced EMF	43
Exa 5.10	Example on Induced EMF	44
Exa 5.11	Example on Induced EMF	44
Exa 5.12	Example on Growth and Decay of Current in Inductive Circuits	45
Exa 5.13	Example on Growth and Decay of Current in Inductive Circuits	45
Exa 5.14	Example on Growth and Decay of Current in Inductive Circuits	46
Exa 5.15	Example on Growth and Decay of Current in Inductive Circuits	46

Exa 5.16	Example on Energy Stored in Magnetic Field	47
Exa 5.17	Example on Energy Stored in Magnetic Field	47
Exa 5.18	Example on Energy Stored in Magnetic Field	48
Exa 6.1	Example on AC Wave Shapes	50
Exa 6.2	Example on AC Wave Shapes	52
Exa 6.3	Example on AC Wave Shapes	52
Exa 6.4	Example on AC Wave Shapes	53
Exa 6.5	Example on AC Wave Shapes	54
Exa 6.6	Example on AC Wave Shapes	54
Exa 6.7	Example on AC Wave Shapes	58
Exa 6.8	Example on AC Wave Shapes	59
Exa 6.9	Example on AC Wave Shapes	62
Exa 6.10	Example on AC Wave Shapes	62
Exa 6.11	Example on Phase Difference	64
Exa 6.13	Example on Simple AC Circuits	64
Exa 6.14	Example on Simple AC Circuits	65
Exa 7.1	Example on AC Series Circuit	66
Exa 7.2	Example on AC Series Circuit	66
Exa 7.3	Example on AC Series Circuit	67
Exa 7.4	Example on AC Series Circuit	68
Exa 7.5	Example on AC Series Circuit	69
Exa 7.6	Example on AC Series Circuit	69
Exa 7.7	Example on AC Series Circuit	71
Exa 7.8	Example on AC Series Circuit	71
Exa 7.9	Example on AC Series Circuit	72
Exa 7.10	Example on AC Series Circuit	73
Exa 7.11	Example on AC Series Circuit	74
Exa 7.12	Example on AC Series Circuit	74
Exa 7.13	Example on AC Series Circuit	75
Exa 7.14	Example on AC Series Circuit	76
Exa 7.15	Example on AC Series Circuit	77
Exa 8.1	Example on Phasor Method	78
Exa 8.2	Example on Phasor Method	79
Exa 8.3	Example on Phasor Method	81
Exa 8.4	Example on Phasor Method	82
Exa 8.5	Example on Admittance Method	84
Exa 8.6	Example on Symbolic Method	85
Exa 8.7	Example on Symbolic Method	86

Exa 8.8	Example on Symbolic Method	87
Exa 8.9	Example on Symbolic Method	88
Exa 8.10	Example on Series Parallel Circuit	89
Exa 8.11	Example on AC Network Theorems	90
Exa 8.12	Example on Resonance in Parallel Circuits .	91
Exa 8.13	Example on Resonance in Parallel Circuits .	93
Exa 9.1	Example on Three Phase Circuits	95
Exa 9.2	Example on Three Phase Circuits	96
Exa 9.3	Example on Three Phase Circuits	97
Exa 9.4	Example on Three Phase Circuits	98
Exa 9.5	Example on Three Phase Circuits	99
Exa 9.6	Example on Three Phase Circuits	99
Exa 9.7	Example on Three Phase Circuits	100
Exa 9.8	Example on Power Measurement	101
Exa 9.9	Example on Power Measurement	101
Exa 9.10	Example on Power Measurement	102
Exa 9.11	Example on Power Measurement	103
Exa 9.12	Example on Power Measurement	103
Exa 10.1	Example on Moving Coil Instruments	105
Exa 10.2	Example on Moving Coil Instruments	105
Exa 10.3	Example on Moving Coil Instruments	106
Exa 10.4	Example on Moving Coil Instruments	107
Exa 10.5	Example on Moving Coil Instruments	107
Exa 10.6	Example on Moving Coil Instruments	108
Exa 13.1	Example on Heating and Cooling of Electrical Machines	109
Exa 13.2	Example on Heating and Cooling of Electrical Machines	110
Exa 14.1	Example on EMF Equation	111
Exa 14.2	Example on EMF Equation	111
Exa 14.3	Example on Equivalent Circuit	112
Exa 14.4	Example on Equivalent Circuit	113
Exa 14.5	Example on Regulation and Efficiency	114
Exa 14.6	Example on Regulation and Efficiency	114
Exa 14.7	Example on Regulation and Efficiency	115
Exa 14.8	Example on Regulation and Efficiency	116
Exa 14.9	Example on Regulation and Efficiency	117
Exa 14.10	Example on Regulation and Efficiency	118

Exa 14.11	Example on Regulation and Efficiency	118
Exa 14.12	Example on Regulation and Efficiency	119
Exa 14.13	Example on Regulation and Efficiency	119
Exa 14.14	Example on Testing of Transformer	120
Exa 14.15	Example on Testing of Transformer	121
Exa 14.16	Example on Testing of Transformer	122
Exa 14.17	Example on Parallel Operation	122
Exa 14.18	Example on Parallel Operation	123
Exa 15.1	Example on three phase transformer	125
Exa 15.2	Example on three phase transformer	126
Exa 15.3	Example on three phase transformer	126
Exa 15.4	Example on three phase transformer	127
Exa 16.2	Example on Electromechanical Energy Con- version Devices	128
Exa 16.3	Example on Electromechanical Energy Con- version Devices	129
Exa 17.1	Example on DC Winding	130
Exa 17.2	Example on DC Winding	130
Exa 17.3	Example on EMF Equation	131
Exa 17.4	Example on EMF Equation	131
Exa 17.5	Example on EMF Equation	132
Exa 17.6	Example on EMF Equation	132
Exa 17.7	Example on Types of DC Machines	133
Exa 17.8	Example on Types of DC Machines	133
Exa 17.9	Example on Types of DC Machines	134
Exa 17.10	Example on Types of DC Machines	134
Exa 17.11	Example on Types of DC Machines	135
Exa 17.12	Example on Types of DC Machines	135
Exa 17.13	Example on Types of DC Machines	136
Exa 17.14	Example on Types of DC Machines	137
Exa 18.1	Example on Magnetization Characteristics .	138
Exa 18.2	Example on Magnetization Characteristics .	140
Exa 18.3	Example on Magnetization Characteristics .	141
Exa 18.4	Example on Magnetization Characteristics .	143
Exa 18.5	Example on Parallel Operation	145
Exa 18.6	Example on Parallel Operation	146
Exa 18.7	Example on Parallel Operation	147
Exa 19.1	Example on Torque and Speed	148

Exa 19.2	Example on Torque and Speed	149
Exa 19.3	Example on Torque and Speed	149
Exa 19.4	Example on Torque and Speed	150
Exa 19.5	Example on Torque and Speed	151
Exa 19.6	Example on Torque and Speed	152
Exa 19.7	Example on Torque and Speed	153
Exa 19.8	Example on Speed Control of DC Motors . .	153
Exa 19.9	Example on Speed Control of DC Motors . .	154
Exa 19.10	Example on Speed Control of DC Motors . .	155
Exa 19.11	Example on Speed Control of DC Motors . .	155
Exa 19.12	Example on Speed Control of DC Motors . .	156
Exa 19.13	Example on Speed Control of DC Motors . .	157
Exa 20.1	Example on losses in DC Machine	158
Exa 20.2	Example on losses in DC Machine	158
Exa 20.3	Example on losses in DC Machine	159
Exa 20.4	Example on losses in DC Machine	160
Exa 20.5	Example on losses in DC Machine	161
Exa 20.6	Example on losses in DC Machine	162
Exa 20.7	Example on losses in DC Machine	163
Exa 20.8	Example on losses in DC Machine	164
Exa 21.1	Example on emf Equation	165
Exa 21.2	Example on emf Equation	166
Exa 21.3	Example on emf Equation	166
Exa 21.4	Example on emf Equation	167
Exa 21.5	Example on emf Equation	168
Exa 21.6	Example on Regulation	169
Exa 21.7	Example on emf Equation	170
Exa 21.8	Example on Regulation	171
Exa 21.9	Example on Regulation	172
Exa 21.10	Example on Regulation	172
Exa 22.1	Example on Phasor Diagram and Power angle Characteristics	174
Exa 22.2	Example on Phasor Diagram and Power angle Characteristics	175
Exa 22.3	Example on Phasor Diagram and Power angle Characteristics	175
Exa 22.4	Example on Phasor Diagram and Power angle Characteristics	177

Exa 22.5	Example on Phasor Diagram and Power angle Characteristics	178
Exa 22.6	Example on Phasor Diagram and Power angle Characteristics	179
Exa 22.7	Example on Phasor Diagram and Power angle Characteristics	179
Exa 22.8	Example on Variation of Excitation	181
Exa 23.1	Example on Slip and Rotor Frequency	183
Exa 23.2	Example on Slip and Rotor Frequency	183
Exa 23.3	Example on Slip and Rotor Frequency	185
Exa 23.4	Example on Equivalent Circuit	186
Exa 23.5	Example on Equivalent Circuit	186
Exa 23.6	Example on Equivalent Circuit	187
Exa 23.7	Example on Equivalent Circuit	189
Exa 23.8	Example on Losses in Induction Motor	191
Exa 23.9	Example on Losses in Induction Motor	191
Exa 23.10	Example on Losses in Induction Motor	192
Exa 23.11	Example on Losses in Induction Motor	192
Exa 23.12	Example on Losses in Induction Motor	193
Exa 23.13	Example on Torque	194
Exa 23.14	Example on Torque	195
Exa 23.15	Example on Torque	196
Exa 23.16	Example on Torque	197
Exa 23.17	No load and Block Rotor Test	198
Exa 23.18	Example on Circle Diagram	199
Exa 23.19	Example on starting	200
Exa 23.20	Example on starting	200
Exa 24.1	Example on Equivalent Circuit	202
Exa 24.2	Example on Equivalent Circuit	203
Exa 24.3	Example on Equivalent Circuit	204
Exa 24.4	Example on No Load and Block Rotor Test	206

18.4 Example on Magnetization Characteristics	144

List of Figures

Chapter 1

DC Circuits

Scilab code Exa 1.1 Example on Ohms Law

```
1
2 //By KCL, I1 + I2=2.25
3 I1=10/(2+8)
4 I2=2.25-I1
5 r=(10-5*I2)/I2
6 mprintf("r=%d ohm, current in branch ABC=%d A and
current in branch ADC=%f A", r, I1, I2)
```

Chapter 2

DC Circuits

Scilab code Exa 1.1 Example on Ohms Law

```
1
2 //By KCL, I1 + I2=2.25
3 I1=10/(2+8)
4 I2=2.25-I1
5 r=(10-5*I2)/I2
6 mprintf("r=%d ohm, current in branch ABC=%d A and
current in branch ADC=%f A" , r, I1, I2)
```

Scilab code Exa 1.2 Example on Ohms Law

```
1
2 //i1 , i2 , i3 be the currents in the branches CD, EF
   and GH respectively
3 //i1+i2+i3=1.5
4 i2=(20-1.5*10)/15
5 i3=(20-1.5*10)/15
6 i1=1.5-i2-i3
7 r=(20-1.5*10)/i1
8 mprintf("r=%f ohm" , r)
```

Scilab code Exa 1.3 Example on Ohms Law

```
1 // points A,E,F,G are at the same potential
2 Rab=20
3 Reb=50
4 R1=Rab*Reb/(Rab+Reb)    //equivalent resistance of Rab
     and Reb
5 Rbc=25
6 R2=R1+Rbc   //equivalent resistance of R1 and Rbc
7 Rfc=50
8 R3=Rfc*R2/(Rfc+R2)   //equivalent resistance of R2
     and Rfc
9 Rcd=30
10 R4=R3+Rcd  //equivalent resistance of R3 and Rcd
11 R=R4*50/(50+R4)  //equivalent resistance between A
     and D
12 i=200/R    //Ohm's Law
13 mprintf("Current drawn by circuit=%f A", i)
```

Scilab code Exa 1.4 Example on Kirchhoffs Law

```
1 // refer Fig. 1.10 in the textbook
2 // applying KCL, I1+I2=20; -I2+I3=30
3 // applying KVL
4 // for mesh ABGHA, -0.1*I2+20*R1=108
5 // for mesh BCFGB, 0.3*I2+20*R1-30*R2=0
6 // for mesh CDEFB, 0.2*I2+30*R2=114
7 a=[-0.1 20 0;0.3 20 -30;0.2 0 30]
8 b=[108;0;114]
```

```

10 x=inv(a)*b
11 I2=x(1,1)
12 R1=x(2,1)
13 R2=x(3,1)
14 I1=20-I2
15 I3=30+I2
16 mprintf("R1=%f ohm, R2=%f ohm, I1=%f A, I2=%f A, I3=%f A", R1, R2, I1, I2, I3)

```

Scilab code Exa 1.5 Example on Kirchhoffs Law

```

1 // refer Fig.1.11 in the textbook
2 // applying KVL over loops ABEFA and BCDEB, I2=3.5*I1; -2*I1+7*I2=10
3 a=[3.5 -1;-2 7]
4 b=[0;10]
5 i=inv(a)*b
6 I1=i(1,1)
7 I2=i(2,1)
8 I=I2-I1
9 mprintf("Current through 8 ohm resistance=%f A from E to B", I)

```

Scilab code Exa 1.6 Example on Kirchhoffs Law

```

1 // refer Fig.1.12 in the textbook
2 // Applying KVL
3 // for mesh AHGBA, -23*i1+20*i2+3*i4=0
4 // for mesh GFCBG, 20*i1-43*i2+20*i3+3*i4=0
5 // for mesh FEDCF, 20*i2-43*i3+3*i4=0
6 // for mesh ABCDJIA, 3*i1+3*i2+3*i3-9*i4+50=0

```

```

8 a=[-23 20 0 3;20 -43 20 3;0 20 -43 3;3 3 3 -9]
9 b=[0;0;0;-50]
10 i=inv(a)*b
11 i1=i(1,1)
12 i2=i(2,1)
13 i3=i(3,1)
14 i4=i(4,1)
15 V1=3*(i4-i1)
16 V2=3*(i4-i2)
17 V3=3*(i4-i3)
18 mprintf(" Voltage across branch AB=%f V, Voltage
           across branch BC=%f V, Voltage across branch CD=
           %f V", V1, V2, V3)

```

Scilab code Exa 1.7 Example on Kirchhoff's Law

```

1
2 // refer Fig.1.13 in the textbook
3 //by applying KVL
4 //for mesh ABCDA, 7.45*i1 -3.25*i2=10
5 //for mesh EFBAE, 8.55*i2 -5.3*i3 -3.25*i1=10
6 //for mesh HGBFEAH, 11.3*i3 -5.3*i2=80
7 a=[7.45 -3.25 0;-3.25 8.55 -5.3;0 -5.3 11.3]
8 b=[10;10;80]
9 i=inv(a)*b
10 i1=i(1,1)
11 i2=i(2,1)
12 i3=i(3,1)
13 mprintf(" Current in 6 ohm resistor=%f A, current in
           3 ohm resistor=%f A", i3, i2-i1)

```

Scilab code Exa 1.8 Example on Superposition Theorem

```

1
2 //using Superposition Theorem
3 //consider E1 alone
4 E1=1.5
5 R1=(1+1)*2/(1+1+2)+2 //total resistance
6 I1=E1/R1 //current supplied
7 i1=I1/2 //current in branch AB from B to A
8 //consider E2 alone
9 E2=1.1
10 R2=(1+1)*2/(1+1+2)+1+1 //total resistance
11 I2=E2/R2 //current supplied
12 i2=I2/2 //current in branch AB from B to A
13 mprintf(" Current through 2 ohm resistor=%f A", i1+i2
)

```

Scilab code Exa 1.9 Example on Superposition Theorem

```

1
2 //refer Fig.1.20 in the textbook
3 //applying KVL
4 //for mesh BAEFB, 4*I1+2*I2=1.5
5 //for mesh BACDB, 2*I1+4*I2=1.1
6 a=[4 2;2 4]
7 b=[1.5;1.1]
8 i=inv(a)*b
9 I1=i(1,1)
10 I2=i(2,1)
11 mprintf(" Current through 2 ohm resistor=%f A from B
to A", I1+I2)

```

Scilab code Exa 1.10 Example on Thevenin Theorem

```

2 //refer Fig.1.22(a) in the textbook
3 //resistance between A and B is removed
4 //I1 be current in branch CD
5 //applying KCL
6 //100-I1 is the current in branch AF
7 //I1-50 is the current in branch DE
8 //70-I1 is the current in branch FE
9 //applying KVL for mesh CDEF, we get ,
10 I1=56
11 V=.1*I1+.15*(I1-50) //thevenin 's voltage
12 r=(.1+.15)*(.1+.15)/(25+.25) //thevenin 's
equivalent resistance
13 I=V/(r+.05)
14 mprintf("Current flowing in the branch AB of 0.05
ohm resistance is %f A", I)

```

Scilab code Exa 1.11 Example on Norton Theorem

```

1
2 //by Norton 's Theorem
3 I=2*10 //total current produced by current source
4 r=2*2/(2+2) //resultant resistance of current source
5 In=20*r/(r+1) //norton current
6 Rn=1+r //norton resistance
7 I=In*Rn/(Rn+8)
8 mprintf("Current through the load resistance of 8
ohm=%f A from A to B", I)

```

Scilab code Exa 1.12 Example on Nodal Analysis

```

1
2 //circuit has 4 nodes , viz , A, B, C and D
3 //node D is taken as reference node

```

```

4 // voltages at A, B and C be Va, Vb and Vc
    respectively
5 //applying KCL
6 //at node A, 7*Va-Vb-Vc=25
7 //at node B, -4*Va+19*Vb-10*Vc=0
8 //at node C, -4*Va-10*Vb+19*Vc=-40
