Book Description

Title: A Textbook of Electrical and Electronics Engineering Materials

Author: P. l. Kapoor

Publisher: Khanna Publishers, New Delhi

Edition: 8

Year: 2010

ISBN: 81-7409-131-9

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes

Chapter 2

Conducting Materials

Scilab code Exa 2.1 Finding resistance

```
1 //Finding resistance
2 //Example 2.1(pg. 21)
3 clc
4 clear
5 l=300//in meters
6 a=25*(10^-6)//in meter square
7 d15=2.7//density at 15 degree C in ohm-meter
8 R15=d15*(l/a)
9 printf('The value of Resistance at 15 degree C is %3
    .2f.ohms \n',R15)
10 k0=0.004//temp coefficient in ohm/degree C at 0
    degree C
11 t=15,T=50//in degree C
12 k15=k0/(1+(k0*t))
13 R50=R15*(1+k15*(T-t))
14 printf('The value of Resistance at 50 degree C is %3
    .2f.ohms',R50)
```

Scilab code Exa 2.2 Finding resistance

```
1 //Finding resistance
2 //Example 2.2(pg. 21)
3 clc
4 clear
5 R20=400// in ohms
6 k0=0.0038
7 t=20,T=80//degree C
8 k1=k0/(1+(k0*t))
9 R80=R20*{1+k1*(T-t)}
10 printf('The value of Resistance at 80 degree C is %3
   .4f ohms',R80)
```

Scilab code Exa 2.3 Finding temperature

```
1 //Finding temperature
2 //Example 2.3(pg. 22)
3 clc
4 clear
5 t=15//degree C
6 R15=250,RT=300//ohms
7 k0=0.0038//ohm/degree C
8 k1=k0/(1+(k0*t))
9 T=[{(RT/R15)-1}/k1]+t//since RT=R15{1+k1*(T-t)}
10 printf('The value of Temperature at 300 ohm
   resistance is %3.1f degree C',T)
```

Scilab code Exa 2.4 Finding length

```
1 //Finding length
2 //Example 2.4(pg. 22)
3 clc
4 clear
5 //Part (a)
```

```
6  d=0.4*(10^-3)//diameter in meter
7  a=%pi*(d^2)/4//area in meter square
8  p1=100*(10^-8)//resistivity of nichrome in ohm-meter
9  R=40//resistance in ohms
10 l1=R*a/p1
11 printf('Thus the length of heater element with
       nichrome wire is %2.1f meter \n',l1)
12
13 //Part(b)
14 d=0.4*(10^-3)//diameter in meter
15 a=12.6*(10^-8)//area in meter square
16 p2=1.72*(10^-8)//resistance of copper wire in ohm-
       meter
17 R=40//resistance in ohms
18 l2=R*a/p2
19 printf('Thus the length of heater element with
       copper wire is %2.1f meter',l2)
```

Scilab code Exa 2.5 Finding resistance

```
1  //Finding resistance
2  //Example 2.5(pg. 23)
3  clc
4  clear
5  R0=80//in ohms
6  t=40// in degree C
7  k0=0.0043
8  R40=R0*(1+(k0*t))
9  printf('The value of Resistance at 40 degree C is %3
       .2f ohms',R40)
```

Scilab code Exa 2.6 Finding temperature coefficient

```
1 //Finding temperature coefficient
2 //Example 2.6(pg. 23)
3 clc
4 clear
5 R80=50,R28=40// resistance in ohms
6 t=28,T=80// temp in degrees
7 k28=[(R80/R28)-1]/(T-t)//since RT=Rt{1+k*(T-t)}
8 printf('The value of Temperature coefficient  at 28
    degree C is %3.4f ohms per degree C \n',k28)
9 k0=k28/(1-k28*t)// since k28=k0/(1+k0*t)
10 printf('The value of Temperature coefficient  at 0
    degree C is %3.4f ohms per degree C',k0)
```

Scilab code Exa 2.7 Finding resistance

```
1 //Finding resistance
2 //Example 2.7(pg. 24)
3 clc
4 clear
5 l=1000// length in meters
6 d=0.09/100// diameter in meters
7 p=1.724*(10^-8)// specific resistance in ohm meter
8 a=%pi*(d^2)/4// area in meter square
9 R=p*l/a//resistance in ohms
10 printf('The value of Resistance is %3.2f ohms',R)
```

Scilab code Exa 2.8 Finding resistance

```
1 //Finding resistance
2 //Example 2.8(pg. 24)
3 clc
4 clear
5 R20=50// resistance in ohms
```

```
6 T=60,t=20// temp in degree C
7 k0=0.00427//temp coefficient at zero degreeC
8 R0=R20/{1+(k0*t)}
9 printf('The value of Resistance at 0 degree C is %3
    .2f ohms \n',R0)
10 R60=R0*{1+(k0*T)}
11 printf('The value of Resistance at 60 degree C is %3
    .2f ohms',R60)
```

Scilab code Exa 2.9 Resistance and temp coeff

```
1 //Finding resistivity and temp coefficient
2 //Example 2.9(pg. 24)
3 clc
4 clear
5 k20=1/254.5// temperature coefficient at 20 degreeC
6 p0=1.6*(10^-6)// resistivity at 0 degree C in ohm-cm
7 t=20,T=50//temp in degree C
8 k0=k20/(1-(t*k20))//temperature coefficient at 0
    degreeC
9 p50=p0*[1+(T*k0)]// resistivity at 50 degree C in
    ohm-cm
10 k50=1/[T+(1/k0)]//temperature coefficient at 50
    degreeC
11 printf('Thus the temperature coefficient at 50
    degree C is %3.4f \n',k0)
12 printf('Thus the resistivity at 50 degree C is %e in
    ohm-cm',p50)
```

Scilab code Exa 2.10 Resistance and temperature

```
1 //Finding resistance and temperature
2 //Example 2.10(pg. 25)
```

```
clc
clear
R15=50,RT=58// resistance in ohms
t=15// te mp in degree C
k0=0.00425// temp coefficient at 0 degree C
R0=R15/[1+(k0*t)]// resistance at 0 degree C in ohms
T=[(RT/R0)-1]/k0// temp in degree C

printf('The value of Resistance at 0 degree C is %3
   .1f ohms \n',R0)
printf('The value of Temperature at 58 ohm
   resistance is %3.4f degree C',T)
```

Scilab code Exa 2.11 Finding temperature coefficient

```
//Finding temperature coefficient
//Example 2.11(pg. 25)
clc
clear
R25=50,R70=57.2// resistance in ohms
t=25,T=70// temp in degree C
//since Rt=R0(1+(k0*t))
k0=(R70-R25)/[(R25*T)-(R70*t)]
printf('The temp coefficient at 0 degree C is %3.3f'
   ,k0 )
```

Scilab code Exa 2.12 Resistance and Conductivity

```
//Finding resistance and conductivity
//Example 2.12(pg. 26)
clc
clear
R0=15.5// resistance in ohms
```

```
6 t=16//in degree C
7 k0=0.00428//temp coefficient
8 R16=R0*[1+(k0*t)]
9 G=(R0/R16)*100// since conductance=reciprocal of
    resistance
10 printf('The value of Resistance at 16 degree C is %3
    .4f ohms \n',R16)
11 printf('The value of percentage conductivity at 16
    degree C is %3.2f percent',G)
```

Scilab code Exa 2.13 Finding temperature

```
1 //finding temperature
2 //Example 2.13(pg. 26)
3 clc
4 clear
5 RT=144,R20=10// in ohms
6 t=20// in degree C
7 k20=5*(10^-3)//temp coefficient at 20 degree C
8 T={[(RT/R20)-1]/k20}+t
9 printf('The value of temp required for tungsten bulb
    is %4.2f degree C',T)
```

Scilab code Exa 2.14 Finding temperature

```
1 //Finding temperature
2 //Example 2.14(pg. 27)
3 clc
4 clear
5 V15=250,Vt=250//voltage in volts
6 I15=5,It=4//current in amperes
7 T=15//temp in degree C
8 R15=V15/I15//resistance in ohms at 15 degreeC
```

```
9  printf('Resistance at 15 degree C is %3.1f ohms \n',
       R15)
10 Rt=Vt/It//resistance at t degreeC
11 printf('Resistance at t degree C is %3.1f ohms \n',
       Rt)
12 k0=0.0038
13 R0=R15/[1+(k0*T)]
14 printf('Resistance at 0 degree C is %3.2f ohms \n',
       R0)
15 t=[(Rt/R0)-1]/k0
16 printf('Temperature t is %3.2f degree C',t)
```

Scilab code Exa 2.15 Finding resistance

```
1  //Finding resistance
2  //Example 2.15(pg. 28)
3  clc
4  clear
5  n=100//no of slots
6  c=12//conductors per slot
7  Lm=300// mean length of turn in cm
8  a=1.5*0.2//cross section of each conductor in cm^2
9  s=1.72*(10^-6)//specific resistance of copper at 20
       degreeC
10 p=4// poles
11 t=20,T=75//temp in degreeC
12 k0=0.00427//temp coefficient of resistivity for
       copper
13 L=n*c*Lm//total length of conductors
14 Ls=L/p//length of conductors in each parallel path
15 s0=s*(1-(k0*t))
16 printf('Thus specific resistance at 0 degree C is %e
       ohm-cm \n',s0)
17 RT=(s0*Ls)/a
18 printf('Thus resistance at working temp of 75 degree
```

```
C is %3.4f ohm',RT)
```

Scilab code Exa 2.16 Finding resistance

```
//Finding resistance
//Example 2.16(pg. 28)
clc
clear
a=15//cross section area in cm^2
l=100000//length in cm
p0=7.6*(10^-6)//specific resistance at 0 degree C in
    ohm-cm
k0=0.005//temp coefficient at 0 degree C
t=50//temp in degree C
p50=p0*[1+(t*k0)]//resistivity at 50 degree C
R50=p50*(l/a)
printf('Thus resistance at 50 degree C is %3.5f ohms
    \n',R50)
```

Scilab code Exa 2.17 Finding fusing current

```
//Finding fusing current
//Example 2.17(pg. 29)
clc
clear
I2=27.5//current of No.25 wire in Amperes
d=1/2//since I1/I2=1/2
I1=I2*(d^(3/2))
printf('Thus fusing current of No.33 wire is %3.3f
   amperes \n',I1)
```

Scilab code Exa 2.18 Finding ratios

```
1 //Finding ratios
2 //Example 2.18(pg. 30)
3 clc
4 clear
5 sAl=2.85*(10^-6),sCu=1.7*(10^-6)//specific
     resistance in ohm-cm
6 gAl=2.71,gCu=8.89//specific gravity
7 cAl=5000,cCu=10000//cost per tonne
8 //P=V^2/R, power is same for both so resistance must
     also be same
9 //so R=(p*l)/(pi*d^2)=(p*l)/(pi*d'^2)
10 Kd=sqrt(sAl/sCu)//Kd=d/d'
11 printf('Thus the ratio of diameters is %3.3f \n',Kd)
12 Km=(Kd^2)*(gAl/gCu)
13 printf('Thus the ratio of weights is %3.4f \n',Km)
14 Kc=Km*(cAl/cCu)
15 printf('Thus the ratio of costs is %3.4f',Kc)
```

Scilab code Exa 2.19 Finding resistance

```
1 //Finding resistance
2 //Example 2.19(pg. 33)
3 clc
4 clear
5 R1=18.6//resistacne in ohms
6 Kl=5//since l2=5*l1
7 Ka=3// since a2=3*a1
8 R2=R1*Kl/Ka
9 // resistivity is same because wires are of same
     material
10 printf('Thus the resistance of another conductor is
     %3.1f ohms',R2)
```

Scilab code Exa 2.20 Finding heat efficiency

```
1 //Finding heat efficiency
2 //Example 2.20(pg. 57)
3 clc
4 clear
5 m=1//mass in kg
6 S=4200//specific heat of water
7 T2=100,T1=15// temp in degree C
8 H=m*S*(T2-T1)//heat utilised in J
9 printf('Heat utilised is %6.2f Joules \n',H)
10 W=500//wattage rating of kettle in volts
11 t=15*60// time in sec
12 Hd=W*t//heat developed in J
13 printf('Heat developed is %6.2f Joules \n',Hd)
14 He=(H/Hd)*100//Heat efficiency
15 printf('Thus heat efficiency is %3.2f percent',He)
```

Scilab code Exa 2.21 Finding time

```
1 //Finding time
2 //Example 2.21(pg. 58)
3 clc
4 clear
5 m=3.6//mass in kg
6 S=4200//specific heat of water
7 T2=95,T1=15// temp in degree C
8 H=m*S*(T2-T1)//heat utilised in J
9 printf('Heat utilised is %7.2f Joules \n',H)
10 e=0.84//efficiency of kettle
11 Ei=H/e//Energy input in J
12 printf('Energy input is %8.2f Joules \n',Ei)
```

```
13 W=1000//rating of kettle in watts
14 t=(Ei/W)/60//time taken in min
15 printf('Thus time taken is %2.1f min \n',t)
```

Chapter 4

Insulating Materials

Scilab code Exa 4.1 Finding capacitance

```
1 //Finding capacitance
2 //Example 4.1(pg 110)
3 clc
4 clear
5 // Let C1 and C2 be unknown capacities
6 //C1+C2=0.16
7 //(C1*C2)/(C1 + C2)=0.03
8 // from the above 2 equations we get the following
     polynomial
9 s=poly(0,"s");
10 p=s^2 -0.16*s +0.0048
11 [c1]=roots(p)
12 c2=0.16-c1
13 printf('Thus the capacitance of condensers is  %3.2f
     microF \n ',c1)
```

Scilab code Exa 4.2 Finding capacitance

```
1 //Finding capacitance
2 //Example 4.2(pg 110)
3 clc
4 clear
5 n=9;
6 Ko=8.854*10^-12;
7 K=5;
8 A=12*10^-4;
9 d=2*10^-4;
10
11 C=(n-1)*Ko*K*A/d
12 printf('Thus the capacitance is %e F',C);
13 //The Answer in the Textbook has a calculation error
   , hence it doesn't match the answer here.
```

Scilab code Exa 4.3 Finding heat

```
1 //Finding heat
2 //Example 4.3(pg 110)
3 clc
4 clear
5 C=10^-6
6 V=10000
7 //here C is capacitance and V voltage
8 E=1/2*C*V^2
9 //E is the energy stored in the capacitor
10 // when the capacitor is discharged all this energy
   is dissipated as heat in the wire
11 H=E/4.2
12 //H is heat produced in calories since 4.2 Joules=1
   calorie
13 printf('Thus the heat produced is %3.4f calories',H)
```

Scilab code Exa 4.4 Finding flux density

```
1 //Finding electric flux density
2 //Example 4.4(pg 111)
3 clc
4 clear
5
6 A=0.02;//surface area of plates in meter square
7 d=0.001;//distance between the plates in meter
8 C=4.5*10^-10;//capacitance of the capacitor in farad
9 //for paralel plate condenser C=KoKA/d
10 Ko=8.854*10^-12;
11 //dielectric constant K is given by
12 K=(C*d)/(Ko*A)
13 V=15000;//volatage in volts
14 Q=C*V// charge on condenser in columb
15 D=Q/A// electric flux density in columb per meter
   square
16 printf('Thus the electric flux density is %e C/(m^2)
   ',D)
```

Scilab code Exa 4.5 Finding relative permeability

```
1 //Finding relative permittivity
2 //Example 4.5(pg 111)
3 clc
4 clear
5 //before inserting the second sheet
6 d=0.003;//distacne between plates in m^2
7 K1=6;// relative permittivity of air
8 Ko=8.854*10^-12;
9 // capacitance C1=Ko*K1*A/d in Farad
10 //after inserting the second sheet
11 d1=0.003;//thickness of first sheet in meter
12 d2=0.005;//thickness of second sheet in meter
```

```
13 //K2 is unknown
14 //C2=Ko*A/(d1/K1 + d2/K2)
15 // but given that C2=(1/3)*C1
16 //from equations 1,2,3
17 K2= (d2*K1)/(3*d-d1)
18 // since Ko*A/(d1/K1 + d2/K2)=Ko*K1*A/3*d
19 printf('Thus K2 is %3.4f',K2)
```

Scilab code Exa 4.6 Finding force

```
1 //Finding force
2 //Example 4.6(pg 113)
3 clc
4 clear
5 q1=1;// in coulomb
6 q2=1;// in coulomb
7 Eo=8.854*10^-12;// in Farad per meter
8 Er=1;
9 d=1// in meter
10 pi=3.14;
11 // F is the force between 2 charges in NEWTONS
12 F=(q1*q2)/(4*pi*Eo*Er*d^2)
13
14 printf('Thus the force between 2 charges is %e',F)
```

Scilab code Exa 4.7 Finding charge

```
1 //Finding charge
2 //Example 4.7(pg 114)
3 clc
4 clear
5 //q1=q2=q
6 pi=3.14;
```

```
d=0.2;// in meters
K=9*10^9;// here K=1/4*pi*Eo*Er constant
F=9.81*10^-1;// in newtons or 10^-1 kgm
q=sqrt((F*(d^2))/K)
printf('Thus charge is %e in coulomb',q)
```

Chapter 5

Dielectric Materials

Scilab code Exa 5.1 Charge and capacitance

```
1 //Finding charge and capacitance
2 //Example 5.1(pg 193)
3 clc
4 clear
5 t=0.25//time in sec
6 I=0.22//Current in A
7 V=220//voltage in V
8 Q=I*t//charge given to condenser
9 C=Q/V//capacitance of condenser
10 C1=C*(10^6)
11 printf('Charge given to condenser is %3.3f Coulombs
     \n',Q)
12 printf('Capacitance of condenser is %3.4f F',C)
13 printf('or %3.0f microF',C1)
```

Scilab code Exa 5.2 Charge and potential gradient

```
1 //Finding charge and potential gradient
```

```
2 //Example 5.2(pg 193)
3 clc
4 clear
5 C=0.0002*(10^-6)//capacitance in F
6 V=20000//P.D across condenser in V
7 t=2//thickness in mm
8 Q=C*V//charge on each plate in coulomb
9 g=(V/t)*(1/1000)// potential gradient in kV/mm
10 printf('Charge given to condenser is %e Coulombs \n'
    ,Q)
11 printf('Potential gradient of condenser is %3.0f kV/
    mm',g)
```

Scilab code Exa 5.3 Charge and energy

```
1 //Finding charge and energy
2 //Example 5.3(pg 194)
3 clc
4 clear
5 //Before immersion of oil
6 C=0.005*(10^-6)
7 V=500
8 q=C*V
9 E=(1/2)*(C*V*V)
10 printf('Charge of condenser is %e coulomb \n',q)
11 printf('Energy stored in condenser before immersion
    of oil is %e Joules \n',E)
12
13 //After immersion of oil
14 K=2.5
15 q1=q// since no loss of charge
16 C1=K*C//capacity of condenser
17 E1=(q1^2)/(2*C1)// energy stored in condenser
18 printf('Energy stored in condenser after immersion
    of oil is %e Joules',E1)
```

Scilab code Exa 5.4 K and flux density

```
1 //dielectric constant and flux density
2 //Example 5.4(pg 194)
3 clc
4 clear
5 A=0.02//surface area of plate in m^2
6 d=0.001//distance between plates in m
7 C=4.5*(10^-10)//capacitance in F
8 V=15000//voltage in volts
9 K0=8.854*(10^-12)
10 K=(C*d)/(K0*A)
11 q=C*V// charge on condenser in coulombs
12 D=q/A//Electric flux density in Coulomb/m^2
13 printf('Thus dielectric constant is %3.2f \n',K)
14 printf('Thus Electric flux density is %e Coulombs/m
   ^2',D)
```

Scilab code Exa 5.5 Finding capacitance

```
1 //Finding capacitance
2 //Example 5.5(pg 195)
3 clc
4 clear
5 A=0.2//surface area of plate in m^2
6 t=2.5*(10^-5)//thickness of dielectric in m
7 K0=8.854*(10^-12)//permittivity of air  in F/m
8 K=5//relative permittivity of dielectric
9 C=(K*K0*A*(10^6))/t//capacitance of condenser in
   microF
10 printf('Thus the Capacitance of condenser is %3.3f
   microF',C)
```

Chapter 6

Magnetic Materials

Scilab code Exa 6.1 Finding current

```
1 //Finding current
2 //Example 6.1(pg 212)
3 clc
4 clear
5 f=0.01//flux in Wb
6 l=1//mean circumference in m
7 N=1000//tunrs
8 Ur=1000//relative permeability
9 Uo=4*%pi*(10^-7)//permeability of free space in H/m
10 a=0.001// cross section area in m^2
11 I=(f*l)/(N*Uo*Ur*a)// current in Amp. since f=A*T/(l
   /Uo*Ur*a)
12 printf('Thus Current required is %3.3f Amp',I)
```

Scilab code Exa 6.2 Finding relative permeability

```
1 //relative permeability
2 //Example 6.2(pg 212)
```

```
clc
clear
f=1.2*(10^-3)//flux in Wb
l=1.4//mean circumference in m
