¹Funded by a grant from the National Mission on Education through ICT,
<http://spoken-tutorial.org/NMEICT-Intro>. This Textbook Companion and Scilab
codes written in it can be downloaded from the "Textbook Companion Project"
section at the website <http://scilab.in>

Book Description

Title: Physics For Engineers

Author: M. R. Srinivasan

Publisher: New Age Publication,new Delhi

Edition: 2

Year: 2009

ISBN: 8122426034

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
1 Vibrations and Resonance	5
2 Acoustics of Buildings	13
4 Interference	17
5 Diffraction	32
6 Polarization of light and Photoelasticity	39
7 Laser	42
9 Fiber Optics	47
10 Matter and Radiation Dual Nature	52
11 X rays	73
12 Basic Quantum Mechanics	129

List of Scilab Codes

Exa 1.1	Damped Oscillations	5
Exa 1.2	Damped Oscillations	6
Exa 1.3	Harmonic oscillations	7
Exa 1.4	Series circuit	8
Exa 1.5	Series circuit	8
Exa 1.6	Series RLC circuit	9
Exa 1.7	Insulated wire	10
Exa 1.8	Resonant circuit	11
Exa 1.9	Insulated wire	11
Exa 2.1	Absorption of cinema hall	13
Exa 2.2	Reverberation time of a hall	13
Exa 2.3	Reverberation time	15
Exa 4.1	Double slit experiment	17
Exa 4.2	Youngs double slit experiment	17
Exa 4.3	Fresnels biprism	18
Exa 4.4	Fresnels biprism	19
Exa 4.5	Biprism experiment	19
Exa 4.6	Youngs double slit experiment	20
Exa 4.7	Biprism experiment	21
Exa 4.8	Biprism experiment	21
Exa 4.9	Biprism experiment	22
Exa 4.10	Biprism experiment	22
Exa 4.11	Double slit experiment	23
Exa 4.12	Fresnels biprism experiment	24
Exa 4.13	Refractive index of oil	24
Exa 4.14	Reflection from soap film	25
Exa 4.15	Wedge shaped air film	26
Exa 4.16	Wedge shaped air film	27

Exa 4.17	Newton's Rings experiment	27
Exa 4.18	Newton's Rings experiment	28
Exa 4.19	Newton's Rings experiment	28
Exa 4.20	Newton's Rings experiment	29
Exa 4.21	Michelson's interferometer	29
Exa 4.22	Michelson's interferometer	30
Exa 4.23	Michelson's interferometer	30
Exa 4.24	Michelson's interferometer	31
Exa 5.1	Lines on grating surface	32
Exa 5.2	Difference in angle of deviation	32
Exa 5.3	Number of grating lines	33
Exa 5.4	Spectral lines	34
Exa 5.5	Angle of separation between lines	35
Exa 5.6	Dispersive power of diffraction grating	36
Exa 5.7	Highest order spectrum	36
Exa 5.8	Wavelength of lines in second order spectrum	37
Exa 5.9	The grating element	38
Exa 6.1	Polarizing angle	39
Exa 6.2	Quarter wave plate	39
Exa 6.3	Quarter wave plate	40
Exa 6.4	Quartz plate	40
Exa 7.1	Electric field of laser beam	42
Exa 7.2	Electric field of a bulb	43
Exa 7.3	Electric field intensity	43
Exa 7.4	Ratio of populations	44
Exa 7.5	Ratio of populations	44
Exa 7.6	Ratio of stimulated to spontaneous emission	45
Exa 7.7	No of photons emitted	46
Exa 9.1	No of modes in optical fiber	47
Exa 9.2	Attenuation of light	48
Exa 9.3	Angle of acceptance	48
Exa 9.4	Angle of acceptance	49
Exa 9.5	Loss of specification	49
Exa 9.6	Core Cladding interface	50
Exa 9.7	Fiber length	51
Exa 10.1	Temperature of the star	52
Exa 10.2	Energy radiated per minute	52
Exa 10.3	Work function of a metal	53

Exa 10.4	Temperature of the sun	54
Exa 10.5	Cooling of the black body	54
Exa 10.6	Emissivity of a body	55
Exa 10.7	Cooling of a sphere	55
Exa 10.8	Current in the wire	56
Exa 10.9	Energy density of a black body	57
Exa 10.10	Photoelectric effect	58
Exa 10.11	Retarding potential	58
Exa 10.12	Photoelectric effect	59
Exa 10.13	Photoelectric effect	59
Exa 10.14	Work function for caesium	61
Exa 10.15	Photoelectric effect	61
Exa 10.16	Photoelectric effect	62
Exa 10.17	Scattering angle	63
Exa 10.18	Compton shift	63
Exa 10.20	Scattering angle	64
Exa 10.21	DeBroglie wavelength	65
Exa 10.22	DeBroglie wavelength	66
Exa 10.23	DeBroglie wavelength	66
Exa 10.24	DeBroglie wavelength	67
Exa 10.25	Group velocity for wave packet	68
Exa 10.26	Braggs reflection	68
Exa 10.27	Braggs spectrum	68
Exa 10.28	Davisson Germer experiment	69
Exa 10.29	Accuracy in locating position of electron . .	69
Exa 10.30	Uncertainty of veliocity	70
Exa 10.31	Uncertainty in momentum	71
Exa 10.32	Laser transition	71
Exa 11.1	No of electrons in the X ray spectrum . . .	73
Exa 11.2	Interplanar spacing to obtain second order maxima	73
Exa 11.3	Wavelength to produce intensity maxima . .	74
Exa 11.4	Line of wavelength	75
Exa 11.5	Identifying impurity element	116
Exa 11.6	Miller Indices	116
Exa 11.7	Miller Indices	117
Exa 11.8	Miller Indices	118
Exa 11.9	Interplanar distance in a crystal	119

Exa 11.10	Interplanar spacing in the reflecting planes	119
Exa 11.11	Braggs reflection	120
Exa 11.12	Braggs reflection	120
Exa 11.13	Interplanar spacing in Braggs reflection	121
Exa 11.14	Lattice constant	122
Exa 11.15	Unit cell dimensions	122
Exa 11.16	Lattice constant and cubic structure	123
Exa 11.17	Lattice parameter and cubic structure	124
Exa 11.18	Effective temperature of neutron	124
Exa 11.19	Braggs angle	125
Exa 11.20	Braggs reflection	126
Exa 11.21	Braggs reflection	127
Exa 11.22	Braggs reflection	128
Exa 12.1	Energy and momentum of the particle	129
Exa 12.2	Wavelength of radiation	130
Exa 12.3	Uncertainty in momentum	130
Exa 12.4	Potential Well	131
Exa 12.5	Penetration distance of electron	131
Exa 12.6	Tunneling probability	132

Chapter 1

Vibrations and Resonance

Scilab code Exa 1.1 Damped Oscillations

```
1 clc ;
2 clear ;
3 m=100*10^-3 //flat disc mass in kg
4 t=60 //time period of oscillation in sec
5 omega=10 //frequency in Hz
6
7 //Calculation
8 damp_omega=log(2)/60 //amplitude of damped
    oscillator for A/C = 1/2 in rad/s
9 c= 2*m*damp_omega
10 tau= 1/damp_omega
11
12 mprintf(" Resistive force = %0.2e newton-s/meter \n",
    c)
13 mprintf(" Relaxation time = %2.2f s" ,tau) //The
    answer provided in the textbook is wrong.
```

Scilab code Exa 1.2 Damped Oscillations

```
1 clc ;
2 clear ;
3 K=10 //Spring constant in N/m
4 m=0.1 //Mass in kg
5
6 //calculation
7 // for (a)
8 damp_omega=-1/-100
9 c=m*2*damp_omega
10
11 //for (b)
12 omega_n=sqrt(K/m)
13
14 //for (c)
15 eta=damp_omega/omega_n
16 Q=1/(2*eta)
17 omega_d=omega_n*sqrt(1-eta^2) //in radian/s
18
19 //for (d)
20 fract_change=0.5*(eta^2) //fractional change in
   frequency
21 percent_change=fract_change*(10^2)
22
23 mprintf("\\n(a)\\n")
