codes written in it can be downloaded from the "Textbook Companion Project"
section at the website <http://scilab.in>

Book Description

Title: Programming In Ansi C

Author: E. Balagurusamy

Publisher: Tata McGraw - Hill Education, New Delhi

Edition: 4

Year: 2008

ISBN: 978-0-07-064822-7

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
1 Overview of C	5
2 Constants Variables and Data Types	10
3 Operators and Expressions	17
4 Managing Input and Output Operations	25
5 Decision Making and Branching	39
6 Decision Making and Looping	51
7 Arrays	67
8 Character Arrays and Strings	87
9 User Defined Functions	102
10 Structures and Unions	115
12 File Management in C	125
13 Dynamic Memory Allocation and linked Lists	137

List of Scilab Codes

Exa 1.3	Printing a mesage	5
Exa 1.4	Adding two numbers	5
Exa 1.5	Interest Calculation	6
Exa 1.6	Use of subroutines	7
Exa 1.7	Use of math functions	8
Exa 2.1	Representation of integer constants on a 16 bit computer	10
Exa 2.1cs	Case study 1 avg of numbers	11
Exa 2.2	typical declarations assignments and values stored in various types of variables	11
Exa 2.2cs	Case study temprature in Farenheit and Celsius	13
Exa 2.3	use of scanf function	13
Exa 2.4	Interest calculation using scanf	14
Exa 3.1	Use of integer arithmetic	17
Exa 3.1cs	case study 1 salesmans salary	17
Exa 3.2	Sequence of squares of numbers	18
Exa 3.2cs	case study 2 solution of the quadratic equation	19
Exa 3.3	Different kind of operators	20
Exa 3.4	Use of variables in expressions	22
Exa 3.5	Round off errors	22
Exa 3.6	Cast to evaluate the equation	23
Exa 4.1	Use of getchar function	25
Exa 4.1cs	Case study 1 Inventory report	26
Exa 4.2	Whether character is alphabet or digit or special character	27
Exa 4.2cs	Case study 2 Reliability graph	30
Exa 4.3	Print character in reverse case	30

Exa 4.4	Input formatting options	31
Exa 4.5	Reading of real numbers	33
Exa 4.6	Reading of strings	33
Exa 4.8	Testing for correctness	34
Exa 4.9	Output of integer numbers	35
Exa 4.10	Printing a real number	36
Exa 4.11	Printing of character and strings	37
Exa 5.1	Ratio	39
Exa 5.1cs	Case study 1 range of numbers	40
Exa 5.2	counts the number of boys	41
Exa 5.2cs	Case study 2 Pay Bill Calculations	42
Exa 5.3	Evaluate the power series	45
Exa 5.4	Largest of the three numbers	45
Exa 5.5	Reads the customer number and power consumed	47
Exa 5.6	Loan applications and to sanction loans	48
Exa 5.7	square root for five numbers	49
Exa 6.1	evaluate the equation	51
Exa 6.1cs	Case study 1 Table of Binomial Coefficients	51
Exa 6.2	Multiplication table	53
Exa 6.2cs	Case study 2 Histogram	54
Exa 6.3	Uses a for loop	55
Exa 6.3cs	Case study 3 Minimum Cost	57
Exa 6.4	Read the marks and print total marks	58
Exa 6.4cs	Case study 4 Plotting of two Functions	59
Exa 6.5	Use of the break statement	62
Exa 6.6	Evaluate the series	63
Exa 6.7	Use of continue statement	65
Exa 1.cs	Case study 1 Median of list of numbers	67
Exa 2.cs	Case study 2 Calculation of standard deviation	68
Exa 3.cs	Case study 3 Evaluating a Test	70
Exa 4.cs	Case study 4 Production and sales analysis	71
Exa 7.1	Sum of squares of 10 numbers	76
Exa 7.2	Count the number of students	76
Exa 7.3	Compute and print	80
Exa 7.4	Multiplication table	82
Exa 7.5	Popularity of various cars	83
Exa 1.cs	Case study 1 Counting words in a text	87

Exa 2.cs	Case study 2 Processing of a customer list	88
Exa 8.1	Read a series of words	90
Exa 8.2	Read a line of text	92
Exa 8.3	Copy one string into another	92
Exa 8.4	Display the string under various format specifications	93
Exa 8.5	Program using for loop	94
Exa 8.6	Print the alphabet set a to z and A to Z	96
Exa 8.7	Concatinate the three parts into one string	98
Exa 8.8	Compare whether strings are equal	99
Exa 8.9	Sort a list of names in alphabetical order	100
Exa 1.cs	Case study 1 Calculation of Area under a Curve	102
Exa 9.1	Multiple functions	103
Exa 9.2	Include arguments in function calls	105
Exa 9.3	Return result	106
Exa 9.4	Computes x raised to the power y	107
Exa 9.5	Calculate standard deviation of an array values	108
Exa 9.6	Sort an array	110
Exa 9.7	Autometric variables	111
Exa 9.8	Global variaibles	112
Exa 9.16	Factorial of a number using recursion	113
Exa 1.cs	Case study 1 Book Shop Inventory	115
Exa 10.1	Define a structure type	117
Exa 10.2	Comparison of structure variables	119
Exa 10.3	Calculate the subject wise and student wise totals	120
Exa 10.4	Array member to represent the three subjects	122
Exa 10.5	structure as a parameter to a function	123
Exa 12.1	Read data from keyboard and write it to a file	125
Exa 12.2	Read and write odd and even numbers	126
Exa 12.3	Read and write data to and from the file INVENTORY	128
Exa 12.4	Error handling in file operations	130
Exa 12.5	use of function ftell or mtell and fseek or mseek	131
Exa 12.6	Append additional items to the file INVENTORY	133

Exa 1.cs	Case study 1 Insertion in a sorted list	137
Exa 2.cs	Case study 2 Building a Sorted List	140
Exa 13.3	Create a linear linked list	142
Exa 13.4	Insert the item before the specified key node	144
Exa 13.5	Delete a specified node in the list	147

Chapter 1

Overview of C

Scilab code Exa 1.3 Printing a mesage

```
1 // Example 1.3
2 // SAMPLE PROGRAM 1: PRINTING A MESSAGE
3
4 //Printing Begins
5 printf("I see , I remember") //Printing using printf()
   function
6 //Printing ends
7
8
9 //We can also print a message using disp() function
   in scilab
10 disp("I see , I remember") //Printing using disp()
    function
```

Scilab code Exa 1.4 Adding two numbers

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\1.introduction\exm1.3.sce', -1)
I see,I remember
I see,I remember
-->|
```

Figure 1.1: Printing a message

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\1.introduction\exm1.4.sce', -1)

100.
106.10
-->
```

Figure 1.2: Adding two numbers

```
1 // Example 1.4
2 // SAMPLE PROGRAM 2: ADDING TWO NUMBERS
3
4 number=100;
5 amount=30.75+75.35 ;           // Addition of two numbers
6 disp(number) ;                //Display value of number
                                variable
7 //Display value of amount in floating point with
      five places in all and two places to the right of
      decimalpoint
8 printf("%5.2f",amount);
```

Scilab code Exa 1.5 Interest Calculation

```
1 // Example 1.5
2 // SAMPLE PROGRAM 3: INTEREST CALCULATION
3
4 PRINCIPAL=5000.00;
5 PERIOD=10;
6 //Assignment Statements
7 amount=PRINCIPAL;
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\1.introduction\exm1.5.sce', -1)
0 5000.00
1 5550.00
2 6160.50
3 6838.15
4 7590.35
5 8425.29
6 9352.07
7 10380.80
8 11522.69
9 12790.18
10 14197.10
```

Figure 1.3: Interest Calculation

```
8 inrate=0.11;
9 year=0;
10 //Computation using while loop
11 while(year<=PERIOD)
12     printf("%2d %8.2f\n",year ,amount);
13     value=amount+inrate*amount;
14     year=year+1;
15     amount=value;
16 end //End of while loop
```

Scilab code Exa 1.6 Use of subroutines

```
1 // Example 1.6
2 // SAMPLE PROGRAM 4: USE OF SUBROUTINES
3
4 //Program using function
5
6 function []=mul(a,b) // mul() function starts ( i.e.
    definition starts )
7 y=a*b;
8 printf(" Multiplication of %d and %d is %d",a,b,y)
    ;
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\1.introduction\exm1.6.sci', -1)
Multiplication of 5 and 10 is 50
-->
```

Figure 1.4: Use of subroutines

```
9 endfunction      // mul() function ends
10 a=5;b=10;
11 // Calling mul() function
12 mul(a,b)
```

Scilab code Exa 1.7 Use of math functions

```
1 //          Example 1.7
2 // SAMPLE PROGRAM 5: USE OF MATH FUNCTIONS
3
4 //Program using cosine function
5 angle=0;MAX=180;
6 printf("           Angle           Cos( angle )\n");
7 while(angle<=MAX)
8     x=(%pi/MAX)*angle;
9     y=cos(x);           //Use of cosine function
10    printf("%15d %13.4 f\n",angle,y);
11    angle=angle+10;
12 end
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\1.introduction\exm1.7.sce', -1)
  Angle      Cos(angle)
    0        1.0000
   10       0.9848
   20       0.9397
   30       0.8660
   40       0.7660
   50       0.6428
   60       0.5000
   70       0.3420

  130      -0.6428
  140      -0.7660
  150      -0.8660
  160      -0.9397
  170      -0.9848
  180      -1.0000
```

Figure 1.5: Use of math functions

Chapter 2

Constants Variables and Data Types

Scilab code Exa 2.1 Representation of integer constants on a 16 bit computer

```
1 // Example 2.1
2 // Representation of integer constants on a 16-bit
   computer .
3
4 disp("Integer values");
5 // Integer values larger than 32767 are not stored
   properly on 16-bit machine
6 printf("%d %d %d \n",int16(32767),int16(32767+1),
   int16(32767+10));
7
8 disp("Long integer values");
9 // To store long integers properly , use int32 integer
   type
10 printf("%ld %ld %ld \n",int32(32767),int32(32767+1),
   int32(32767+10));
11 // The same result as from above statement can be
   achieved directly from below commented statement
12 // printf("%ld %ld %ld\n",32767,32767+1,32767+10);
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\2.Datatype\exm2.1.sce', -1)

Integer values
32767 -32768 -32759

Long integer values
32767 32768 32777
```

Figure 2.1: Representation of integer constants on a 16 bit computer

Scilab code Exa 2.1cs Case study 1 avg of numbers

```
1 //      Case Study:-Chapter 2 Page No.-47
2 //      1. Calculation of Average of numbers
3
4 N=10;sum1=0;count=0;           // Initialization of
      variables
5 printf(" Enter ten numbers");
6 while(count<N)
7     number=scnf("%f");    //Reading number(using
      scanf() function)
8     sum1=sum1+number;
9     count=count+1;
10 end
11 average=sum1/N;             //Avarage is calculated
12 printf(" N = %d Sum1 = %f",N,sum1 );
13 printf(" Average = %f ",average );
```

Scilab code Exa 2.2 typical declarations assignments and values stored in various

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\2.Datatype\Casestudy2.1.sce', -1)
Enter ten numbers
-->1
-->2.3
-->4.67
-->1.42
-->7
-->3.67
-->4.08
-->2.2
-->4.25
-->8.21
N = 10 Sum1 = 38.800000 Average = 3.880000
-->
```

Figure 2.3: typical declarations assignments and values stored in various types of variables

Scilab code Exa 2.2cs Case study temprature in Farenheit and Celsius

```
1 // Case Study:- Chapter 2 Page no.-48
2 // 2. Solution of temprature in Farenheit and
   Celsius
3 F_LOW=0;
4 F_MAX=250;
5 STEP=25;
6 fahrenheit=F_LOW;           // Initialization
7 printf("Fahrenheit      Celsius\n\n");
8 while(fahrenheit < = F_MAX)
9     celsius=(fahrenheit-32.0)/1.8;      // conversion
     from Farenheit to Celsius
10    printf("%6.2f      %7.2f\n", fahrenheit,
          celsius);
11    fahrenheit=fahrenheit+STEP;
12 end
```

Scilab code Exa 2.3 use of scanf function

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\2.Datatype\Casestudy2.2.sce', -1)
Fahrenheit      Celsius
0.00           -17.78
25.00          -3.89
50.00          10.00
75.00          23.89
100.00         37.78
125.00         51.67
150.00         65.56
175.00         79.44
200.00         93.33
225.00         107.22
250.00         121.11
```

Figure 2.4: Case study temprature in Farenheit and Celsius

```
1 // Example 2.3
2 // The program illustrate the use of scanf()
   function
3 disp("Enter an interger number:");
4 number=scanf("%d");           //Read from keyboard
5 if(number<100) then
6     disp("Your number is smaller than 100");
7 else
8     disp("Your number contain more than two digits")
9 end
```

Scilab code Exa 2.4 Interest calculation using scanf

```
1 // Example 2.4
2 // Sample program 3(exm1.5) discussed in chapter 1
   can be convered in to a more flexible intractive
   program using scanf() function
3 disp("Enter in single line separted by space");
4 disp("Input amount,interest rate , and period");
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\2.Datatype\exm2.3.sce', -1)

Enter an interger number:
-->54

Your number is smaller than 100

-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\2.Datatype\exm2.3.sce', -1)

Enter an interger number:
-->108

Your number contain more than two digits
```

Chapter 3

Operators and Expressions

Scilab code Exa 3.1 Use of integer arithmetic

```
1 // Example 3.1
2 //The program shows the use of integer arithmetic to
   convert a given number—
3 //of days into months and days
4
5 days=input('Enter days:');
6 months=int16(days/30);           //Compute for months
7 days =int16(pmodulo(days,30));  //compute for days
8 disp(days,"Days =",months,"Months =");
```

Scilab code Exa 3.1cs case study 1 salesmans salary

```
1 // Case Study:-Chapter 3,Page No:76
2 // 1.Salesman's Salary
3
4
5 BASE_SALARY=1500.00;    //Minimum base salary
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\3.operator\exm3.1.sce', -1)
Enter days:265

Months =
8

Days =
25
```

Figure 3.1: Use of integer arithmetic

```
6 BONUS_RATE=200.00;           //Bonus for every computer
    sold
7 COMMISSION=0.02;           //Commission on total monthly
    sales
8 printf("Input number sold and price\n[Enter in
    single line separated by space]"); 
9 [quantity,price] = scanf("%d %f"); //Input
    quantity and price
10 //Computation for bonus ,commission and gross_salary
    of a salesman
11 bonus = BONUS_RATE*quantity;
12 commission = COMMISSION*quantity*price;
13 gross_salary =BASE_SALARY + bonus + commission;
14 printf("Bonus          = %6.2 f\n",      bonus);
15 printf("Commission       = %6.2 f\n",      commission)
    ;
16 printf("Gross salary     = %6.2 f\n",
    gross_salary);
```

Scilab code Exa 3.2 Sequence of squares of numbers

```
1 //          Example 3.2
2 //Program to print a sequence of squares of numbers.
```

```
-->exec('C:\Users\Devender Thakur\Desktop\scilab\scilab programs\3.operator\Casestudy3_1.sce', -1)
Input number sold and price
[Enter in single line separated by space]
-->5 20450.00
Bonus           = 1000.00
Commission      = 2045.00
Gross salary    = 4545.00
